MONZO - Digital Model Builder - This is a great game development that is a designer. Here, users can collect virtual models of various vehicles as well. For example, you can search and build cars, airplanes, tanks, and motorcycles. In addition to transport, there are representatives of the model of weapons, and even the creation of the legendary Leonardo da Vinci. All models have a large number of parts and handle them easily and interestingly. You can also pick up stickers as well as colors to make the item unique. And the results of the work can be shared with friends so that they can understand the creation. Screenshot description: MONZO Digital Model Builder - a beautiful toy from design studio Madnifer Games! Toys allow players to collect different models and enjoy this process anytime, anywhere, anytime, anywhere. With this toy, everyone can collect fairly complex models from simple mechanisms, to ready-made aircraft and even animals! The models are ready, we can take pictures and share them with other players. This toy uses its imagination, with many variants and different possibilities, without raising obstacles! Features: * * Customize your weapon model with a new pistol color palette * Rewards in expert mode are now possible 5 times * Get a new shop bundle with models, colors and stickers in the shop * All packages were made cheap * UX improvements important for simplifying the shop * Us Montzo Velder said it had improved the 는 최고 experience 모델을 the 모델을 box공합니다.
